

TS-EAS annual meeting

Day 1

Karin and Mary

Agenda

Day 1 - Monday, August 10, 2026

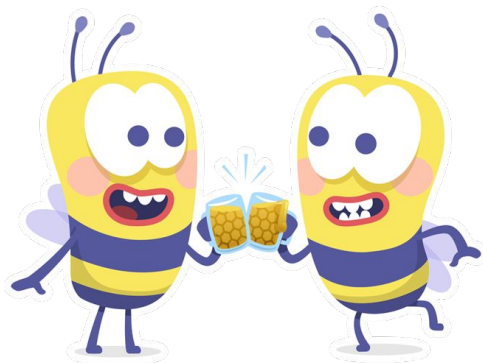

- Co-chairs welcome
 - The structure of the meeting
 - Provide updates on the SAA session and what has happened in the past year leading up to the release of the standards.
 - Provide overview of EAS revisions going forward.
- TS EAS Introduction
 - Overall introduction to TS EAS to new members.
 - All current members provide updates on what was undertaken in the past year - what role did they have, what did they work on, experience, etc.
 - Co-chairs to present on the proposed timeline for the next revision cycle and next steps.

Virtual meeting norms

- Be present (unlike our friends on the left of the screen). Turn off digital distractions such as email, message reminders, and personal chat, and do not do other work during meetings.
- For speakers:
 - If you are planning to share your screen, be sure to have the items you want to share open and ready to go prior to the meeting.
 - For meetings with an agenda, be mindful of the time you have been given to speak and try to keep to it.

Virtual meeting norms (cont'd)

- For participants:
 - All participants should be muted by default during the agenda part of a meeting if not speaking.
 - If you have a question, please raise your hand and the question will be answered in turn.
 - Please participate if you feel comfortable doing so! We encourage everyone to speak if you have an opinion or would like to comment on something.
- We understand that these meetings are during work hours/personal time and you may not be able to attend all scheduled activities. If you plan to drop off the meeting, let everyone know by dropping a message in the chat.
- Above all, please have fun!

Goals of today

- Welcome!
- TS-EAS, who are we?!

**Co-chairs
welcome!**

Update from the SAA Annual meeting session

- 204 signed up in Whova
- ~47 in the Zoom room
- Official release of EAS Suite
- Many congratulations
- Question about influence on DACS and RiC from these new versions
- ArchivesSpace want to hear about use of EAD and EAC-CPF in combination of ArchivesSpace
- Announcements now going out!

Update cont'd

- Provide updates on the SAA session and what has happened in the past year leading up to the release of the standards

Provide overview of EAS revisions going forward

- Since we are approved to do rolling revisions, *we need to have a different mindset going forward*
 - Rolling revisions require agility
 - Outreach will be critical
 - We need to treat the standards as a suite
 - Outreach will be critical (if you didn't see this the first time)
 - Work has to be more evenly distributed within TS EAS
 - Outreach will be critical (if you didn't see this the first 2 times!)
 - It's all hands on deck taking into account your daytime work and needs

TS EAS

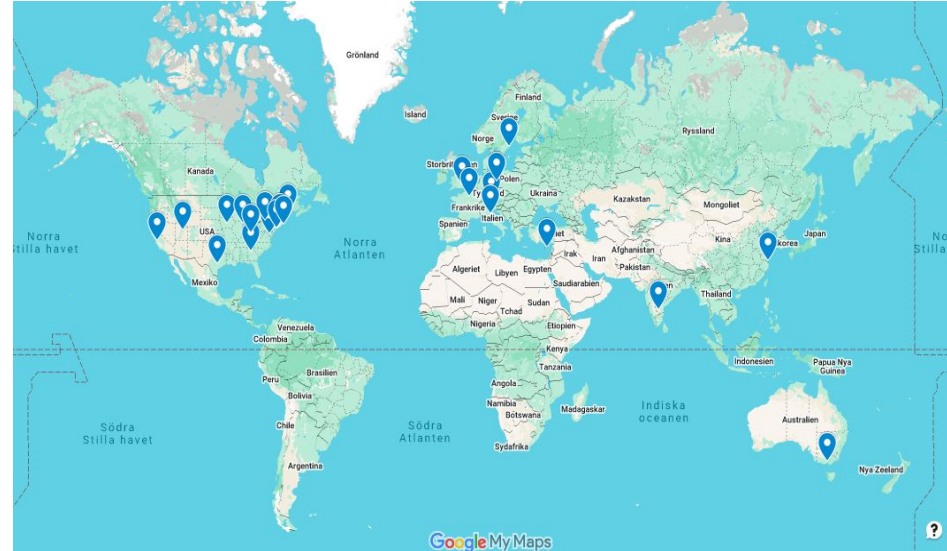

Introduction

Overall introduction to TS EAS to new members

29 members · West Coast USA to East Coast Australia

SAA + international volunteers — maintaining the standards, building the community.

Anais Lichtensztejn

Anais Lichtensztejn is one of the Senior Archivists at The National Archives UK, where her area of focus is on catalogue descriptions and reviewing internal processes. She holds an MA in Archival Practice from the University in Plymouth. She's previously worked in records management and digital preservation roles and was also part of the Digital Preservation Coalition Advocacy and Community Engagement Sub-Committee in 2023-2024.

Bonface Odhiambo

Kevin Clair

I am the Digital Collections Archivist at Penn State University, a role I have held since 2021. I have worked in technical services and digital archives in previous roles at both Penn State (2007-2013; 2019-2021) and the University of Denver (2013-2019). I served previous terms on both the User and Technical Advisory Councils of ArchivesSpace and am active in both SAA and the Mid-Atlantic Regional Archives Conference.

Martha Tenney

I am ArchivesSpace's Standards and Testing Archivist, which means I split my time between maintaining and growing support for metadata standards in the application and improving manual and automated software testing. I work closely with ArchivesSpace members on the Metadata Standards and Testing sub-teams of our Advisory Councils on these activities. Previously I was the Director of the Barnard College Archives and Special Collections and have taught in the Public History Master's Program at New York University. I went to library school at University of Texas at Austin, and I'm from and live in New York City. I'm very excited to work with TS-EAS!

Current members introduction

- Who are you?
- Provide updates on what was undertaken in the past year - what role did you have, what did you work on, experience, etc.

Co-chairs to present on the proposed timeline for the next revision cycle and next steps

Next Revision Cycle

- Rolling revision minor versions
- Year 1
 - Solidify TS EAS goals and structure
 - Information gathering
 - Outreach
- Year 2 and 3
 - Comment gathering
 - Outreach
 - Development of next major version?
- Year 4
 - Release of a major revision?

Next steps

Discuss the work needed and possible ways forward

Tomorrow!

TS-EAS annual meeting

Day 3

Karin and Mary

Agenda

Day 3 - Wednesday, August 12, 2026

- Co-chairs welcome
- Breakout groups give reports
- Full TS EAS discussion
- Next steps and wrap up

Day 2 Summary

- **Review of the task list and the goals of the breakout group.** After recapping Day 1, the co-chairs presented the task list they've compiled over roughly three years. The task list, spanning governance, outreach, and technical questions, served as the foundational document driving the breakout discussions.
 - Karin stressed that with the suite mindset there will no longer be separate EAD / EAC-CPF / EAC-F teams — all three standards must be considered together in every change. What stays fixed: the two co-chairs (who retain ownership of the "different names, same concept" and "concept of entities" questions), the documentation subgroup (technical side of tag libraries and BPG), the editorial board (shepherding BPG articles), and member duties like attending three of four quarterly meetings. Everything else is up for discussion, with future groups intended to be self-governing rather than co-chair-attended.
 - Building on Elizabeth's comment for "bigger, fewer groups," the co-chairs emphasized that this is volunteer work done alongside day jobs and family — members should be able to step away for months if needed (just tell the co-chairs), no task should rest on one individual, and work must be distributed evenly so people feel like valued contributors rather than isolated.

Day 2 Summary cont'd

- **Review of the task list continued**
 - Highlights of the task list include GitHub issue handling, RIC alignment, multilingual articles and translations, reusable presentation stubs, webinars, updating the wiki/microsite/governance rules, validation and tooling, date standards (with an ISO update pending), the un-validatable EAD2002 schema (raising the "only current version supported" design principle), crosswalks to be built via alliances with other standards bodies, and the big questions of whether the suite should eventually converge on a single shared tag library and even a single XML schema.
 - In framing the breakout exercise, the co-chairs encouraged members to think about pain points the teams had experienced and how to best move beyond those pain points.
- **Member-driven breakout brainstorming to shape the TS-EAS roadmap.** 18 participants were sent into four randomly assigned breakout groups for two hours. Groups were asked to review the full list and group similar tasks, suggest additions, removals, splits, or consolidations (with justification), optionally prioritize or sequence tasks, and recommend how each should be fulfilled — by an individual, a new task group, or the full membership. Detailed notes were required since each group reports out on Day 3 and the notes will feed directly into the creation of TS-EAS roadmap.

Breakout groups give report

- Each breakout group gives their conclusions

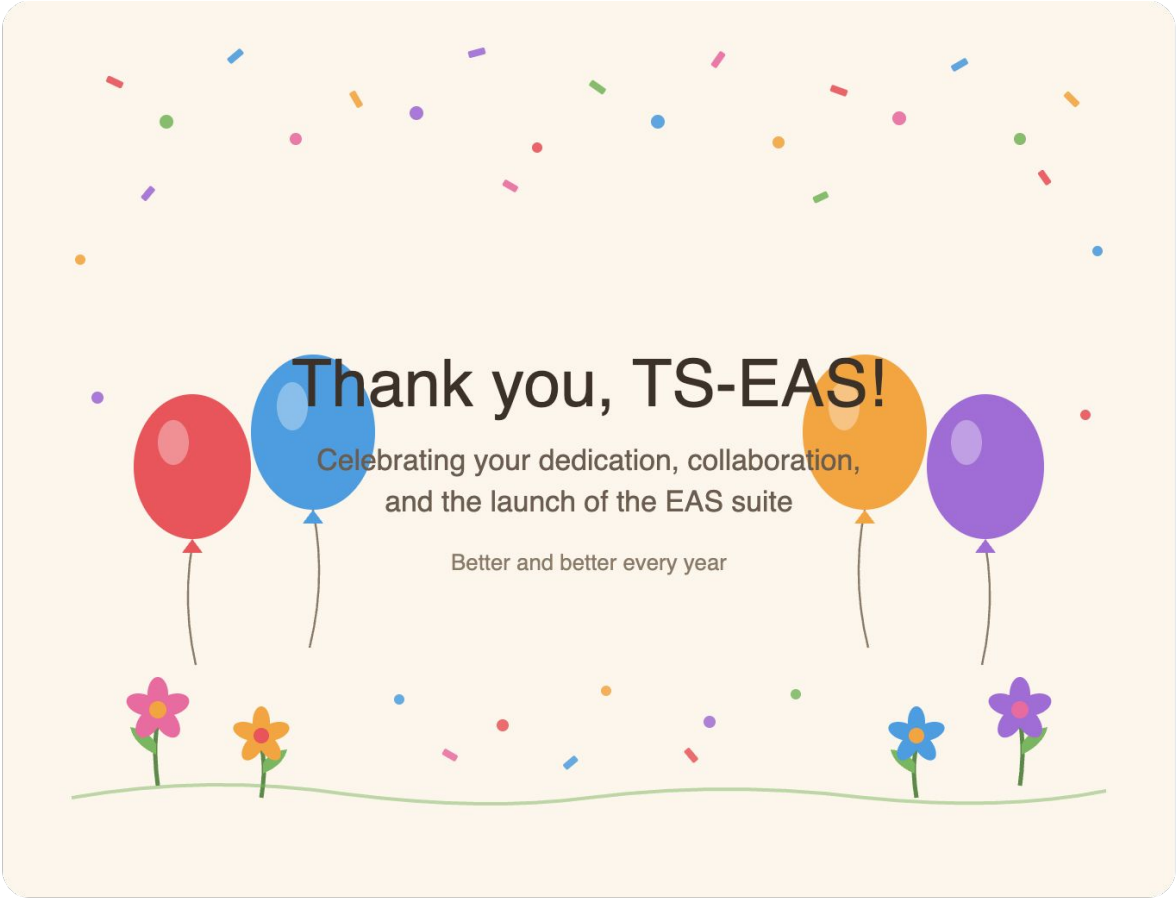

Full TS EAS discussion

Next steps and wrap up

- Co-chairs will meet and discuss the breakout notes/comments over the next couple of weeks
- Co-chairs will create a draft of the TS-EAS roadmap and distribute it in time to TS-EAS members to review by our October meeting.
- Co-chairs will finalize the TS-EAS roadmap by the end of the year.
- In the meantime:
 - Co-chairs will finalize the annual report for 2025-2026 and submit to the Standards Committee
 - TS-EAS members need to continue to spread the word about the new suite of standards
 - TS-EAS member need to continue working on the Best Practices Guide. We encourage members to submit articles and encourage others to contribute.
 - Co-chairs will keep a watchful eye on any comments and distribute tasks/issues within TS-EAS.
 - TS-EAS members up for reappointment need to decide if they want to continue membership and if yes, submit an application.

A celebratory slide with a light beige background. It features scattered colorful confetti (dots and dashes) in shades of blue, green, orange, pink, and purple. Four balloons (red, blue, orange, and purple) are arranged horizontally, each with a string and a small arrow pointing upwards. At the bottom, there are four stylized flowers (pink, orange, blue, and purple) on a green wavy line representing grass. The text is centered on the slide.

Thank you, TS-EAS!

Celebrating your dedication, collaboration,
and the launch of the EAS suite

Better and better every year

TS-EAS annual meeting

Day 2

Karin and Mary

Agenda

Day 2 - Tuesday, August 11, 2026

- Co-chairs welcome and set up expectations for the day
- Breakout groups to discuss how TS-EAS should be structured based on tasks that need to be accomplished.
- Wrap up

Day 1 Summary

- Co-chairs reviewed meeting agenda, meeting norms, and the TS-EAS timeline. Also outlined goals for Day 1.
- Highlights from Day 1:
 - **The EAS suite of standards was officially released on July 31 and presented at SAA in New Orleans.** Co-chairs Mary Samouelian and Karin Bredenberg presented a hybrid session (approximately 90 attendees total, more online than in person), emphasizing that EAD, EAC-CPF, and EAC-F is a unified *suite* rather than standalone standards, and noted positive community reactions — including the Best Practice Guide, which was highlighted as a key living deliverable.
 - **Some concerns about SAA and community engagement.** Attendance at SAA was down (~600 fewer than last year) and TS-EAS members sense a broader disengagement from SAA due to staff departures and organizational challenges. This reinforced the the central message that outreach will be the top priority going forward — including reaching practitioners who use systems like ArchivesSpace without ever touching the underlying XML, and focusing on practical implementation over technical encoding details.

Day 1 Summary (cont'd)

- **Education and awareness of the standards should be an ongoing discussion.** Ideas raised included engaging archival educators, following up with professors (e.g., at Indiana University), reconnecting with NAFAN-related efforts, and building crosswalks/bridges to other schemas (DC, DataCite, RiC) as suggested by Venkat.
- **The committee introduced new members and reviewed its structure.** New members Anais (UK National Archives), Kevin Clair (Penn State), Boniface (Africa, pending connection), and Martha (ArchivesSpace) were welcomed, followed by roundtable introductions from the 20-person membership spanning the US West Coast to Australia. Notably, there is no early-career member this year.
- **Next steps: rolling revisions and a member-driven planning process.** TS-EAS is now approved for a rolling revision cycle (minor revisions need Standards Committee approval; major ones need Standards + Council approval), which requires agility and more evenly distributed work across members. A draft document listing tasks that should be the focus of TS-EAS going forward was shared for members to review ahead of Day 2, when breakout groups will brainstorm priorities — including whether a new major revision is needed — with findings discussed on Day 3.

Tasks Explanation

- Walk through all the tasks

Breakout groups (not recorded)

- Breakout groups
 - There are 2 documents per group:
 - Google doc listing various tasks
 - Google doc for taking notes during discussion
 - It's up to the group to decide how you want to use these 2 documents (choose your own adventure):
 - For example, the group could organize the tasks and take notes or
 - Just use the google doc for taking notes
 - With that said, it's important to take detailed note as this will be used for the discussion on Day 3 and will help in constructing a roadmap for TS-EAS
 - **Be prepared to report in detail on how your breakout group approached/proposes moving forward, e.g., how tasks were organized, new tasks, removed tasks, etc.**

Breakout groups (not recorded)

- Goals:
 - Group “like” tasks
 - Suggest tasks that the group thinks are missing with reasons for addition
 - Suggest tasks that should be removed with reasons for removal
 - Suggest tasks that should be consolidated with reasons for consolidation
 - Suggest a plan for fulfilling all these tasks (e.g. individual, group, a combination or for the entire TS EAS membership)

Wrap up
